

# Chris McCluskey

971-533-8338 chris@mccluskey.us Portland, Oregon

#### **FULL STACK WEB DEVELOPER**

## Skills

| Languages        | Frameworks      | Practices                           | <b>Operations</b>   |
|------------------|-----------------|-------------------------------------|---------------------|
| JavaScript / ES6 | WordPress       | Restful APIs                        | Linux SysAdmin      |
| Python / Go      | Laravel         | Unit testing                        | Vagrant             |
| PHP / SQL        | Codelgniter     | <ul> <li>DRY development</li> </ul> | Docker              |
| C# / Java        | Angular / React | ▶ 12-Factor apps                    | Ansible / SaltStack |
| CSS / HTML       | jQuery          | Git / Hg / SVN                      | Jenkins Cl          |
| Golang           | Celery          | Scrum / Kanban                      | <b>AWS</b>          |

## Experience

#### SR. WEB DEVELOPER, DIGITAL TRENDS; PORTLAND, OR - 2016-2019

- Contributed to core site development in a full stack capacity for <u>digitaltrends.com</u> a WordPress site with 24mm+ unique monthly users that had 4k - 11k concurrent visitors at any moment. Focused on back-end with some front-end work.
- Developed custom WordPress plugins which interacted with internal and external APIs with performance and concurrency in mind. Created custom WPCLI commands to automate content housekeeping tasks. Worked directly with affiliate marketing networks, ad platforms and multiple video providers.
- Developed custom React components for rich client-side experiences. Created social analytics data aggregation platform to facilitate getting reporting data into AWS RDS. Automated tens of thousands of videos from one provider to another.
- Was backup DevOps engineer, making small contributions to infrastructure automation.

#### DIRECTOR OF INTERNAL APPLICATIONS, ETHOLOGY; PORTLAND, OR - 2011-2016

- Rebuilt python-based reporting back-end and IP-rotating web proxy to include multiprocessing and leaky-bucket rate limiting. Refactored later to distribute work over multiple machines.
- Built content analysis tool with site crawling / archival, collaborative version controlled CMS, project management, NLP-based content identification and browser automation.
- Moved hosted infrastructure to SaltStack configuration management, built crossplatform team orientated development environment to match production using Vagrant and VirtualBox, maintained entire linux production stack for all applications, and moved to Jenkins-based continuous integration workflow.

## **Experience** (continued)

Supported front end developers with deployment / best practices / general programming questions.

#### INDEPENDENT CONTRACTOR, DIN.CO; SAN FRANCISCO, CA - 2015-2016

 Contributed PHP / JavaScript maintenance for current production application while company built replacement.

#### INDEPENDENT CONTRACTOR, MESH DIGITAL, INC; VENICE, CA - 2014-2015

Developed browser extension "MESH" for Google Chrome which let users block advertisements from undesirable brands / companies. The extension was written in JavaScript and used AngularJS for the user interface.

#### DIRECTOR OF TECHNOLOGY, ENGINEWORKS; PORTLAND, OR - 2005-2011

- Hired as first employee, built IT infrastructure, handled all tech support / Linux system administration and internal application development. EngineWorks was acquired by Tallwave in 2011 to become "Ethology".
- Built web analytics and tracking suite / customer portal "EngineRoom", maintained on BSD server / LAMP stack.
- Wrote search engine scraper with custom IP-rotating proxy and reporting system.

#### **COMPUTER PROGRAMMER, MY LITTLE SALESMAN; PORTLAND, OR – 2004-2005**

Contributed code on a small team maintaining an online auctioneering web application "VIHN.net" for heavy equipment buyers.

### MANAGER OF TECHNICAL WEB OPERATIONS, MARKETING BY MAIL; EUGENE, OR - 2003-2004

- Built HTML and Flash-based WYSIWYG postcard designer web application that interfaced with a digital printing press and accepted credit cards.
- Deployed and managed the Linux production environment for the system. Implemented secure firewall, off-site backups, managed mail, and DNS.

#### WEB APPLICATIONS ENGINEER, NET SOLUTIONS / MODULUS, OR - 2001-2003

Built CMS system with Custom JavaScript WYSIWYG Editor. Authored FTP client as HTML embedded ActiveX control for large file uploads. Wrote PHP-based PDF generator and web-based calendar / scheduling system.

### **Education**

Lane Community College, Eugene, OR – AAS Computer Programming, 2004
